Summary

PHP Enthusiast, React lover and Laravel specialist. I'm mostly working with Javascript projects at the moment, exploring NextJS and Node.

Skills

PHP • JavaScript • React • Laravel • Next.js • MySQL • AWS (Amazon Web Services) • TypeScript

Work Experience

Full Stack Developer

Aug 2019 – present

Movin • Full-time

Remote

Technologies: PHP • JavaScript • React • Next.js • MySQL

- Initially hired as an intern to learn PHP and Javascript.
- Worked with a PHP-based project using Bootstrap and Javascript for front-end development, and MySQL as the database.
- Interacted with clients, addressed their problems, and developed solutions by implementing new pages, functionalities, and managing the database.
- Recognized the limitations of the existing procedural PHP project and initiated a ground-up reconstruction.
- Acted as the project architect, building the API, and as a UI/UX engineer, creating the React-based user interface.
- Conducted collaborative meetings with the team to find optimal solutions for the issues in the current PDVINFO system and prevent future problems.
- Currently working as a full-stack engineer on a new version of the system.
- Responsible for defining the front-end architecture using Next.js 13 and Tailwind, ensuring a robust and efficient user experience.

Senior Full-Stack

Oct 2022 – Jan 2023 • 3 mos

Easyvog • Freelance

Remote

Technologies: React • Laravel • AWS (Amazon Web Services)

- Previous project in React 16 and PHP 7, but not functional yet.
- Joined as a substitute developer, taking on multiple roles.
- Restructured and upgraded project to React 18/Laravel 9 stack.
- Meticulously rebuilt pages following industry best practices.
- Improved database organization through restructuring.
- Created robust API using Laravel.
- Upgraded hosting to AWS, utilizing s3 and lambda services.
- Implemented efficient CI/CD with GitHub Actions and Serverless.
- Project required diverse skills, from DevOps to full-stack engineering.

Full Stack Developer

Aug 2022 – Oct 2022 • 2 mos

AGORAOS - Milenial • Freelance

Remote

Technologies: Laravel 4 • JavaScript • OOP (Object-Oriented Programming)

- Developed internal tools for sorting new contacts and potential leads.
- Built the project using Laravel 4.2.
- Utilized a custom service/model structure that heavily relied on object-oriented programming (OOP) principles.
- Employed MySQL as the chosen database.
- Hosted the project on AWS infrastructure.

Full Stack Developer

Apr 2022 – Aug 2022 • 4 mos

Club da Cotação • Freelance

Remote

Technologies: Laravel • React • React Native

- Integrated the project's API with the Bling ERP system for seamless data exchange.
- Developed a user-friendly registration page using React to capture external users and leads.
- Addressed security issues in a Laravel 7-based project, particularly focusing on implementing email verification and password reset functionalities and also adding 2FA.
- Conducted a comprehensive refactor of the system to ensure a secure user registration process and resolve the identified security concerns within their database and model relationships.
